Retrieve and Edit your Output

Pro Tip: ALWAYS edit your output.

1) Write your AI-assisted Header and Subheader below.

AI Header: Adventure-Ready for Your Family. Gentle on the Planet.

AI Subheader: Explore more with safe, natural essentials in planet-friendly packaging — adventure-ready products for families who want less waste, more confidence, and zero compromises.

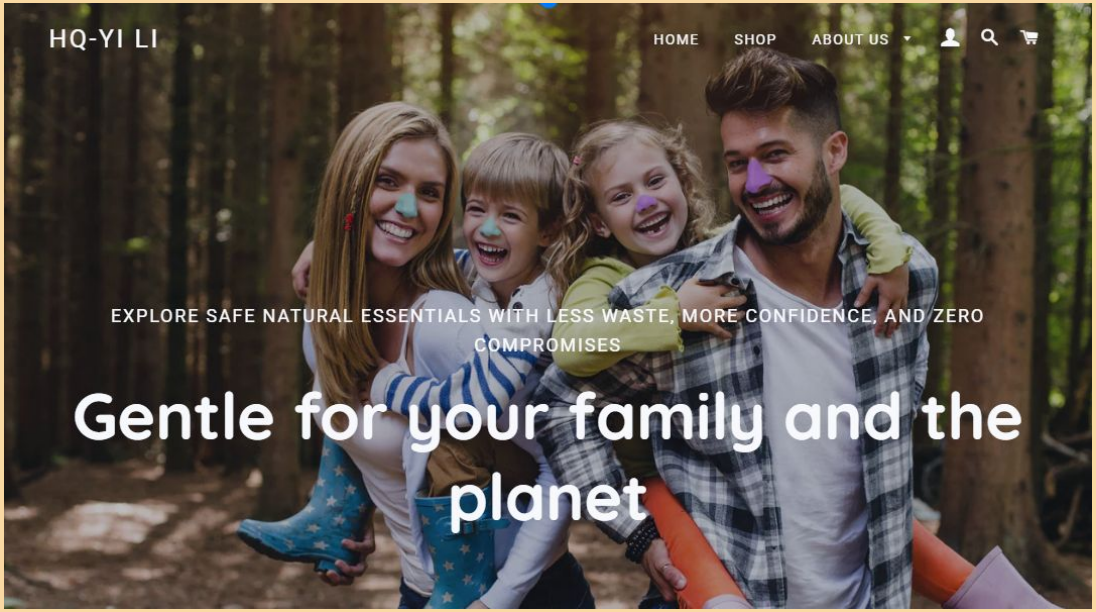

2) Edit your AI-assisted output.

Edited Header:Gentle for your family and the planet

Edited Subheader:Explore safe natural essentials with less waste, more confidence, and zero compromises

‘About Us’

About us

"Lead with your nose." is what our mom used to tell us and it always had us thinking. At the center of our face: capturing memories with smell, a symbol of our intuition, and a natural tool we use to guide ourselves in the world. And since it sticks out the most, shouldn't we offer it the protection it needs to keep doing what we do with it?

Color palette

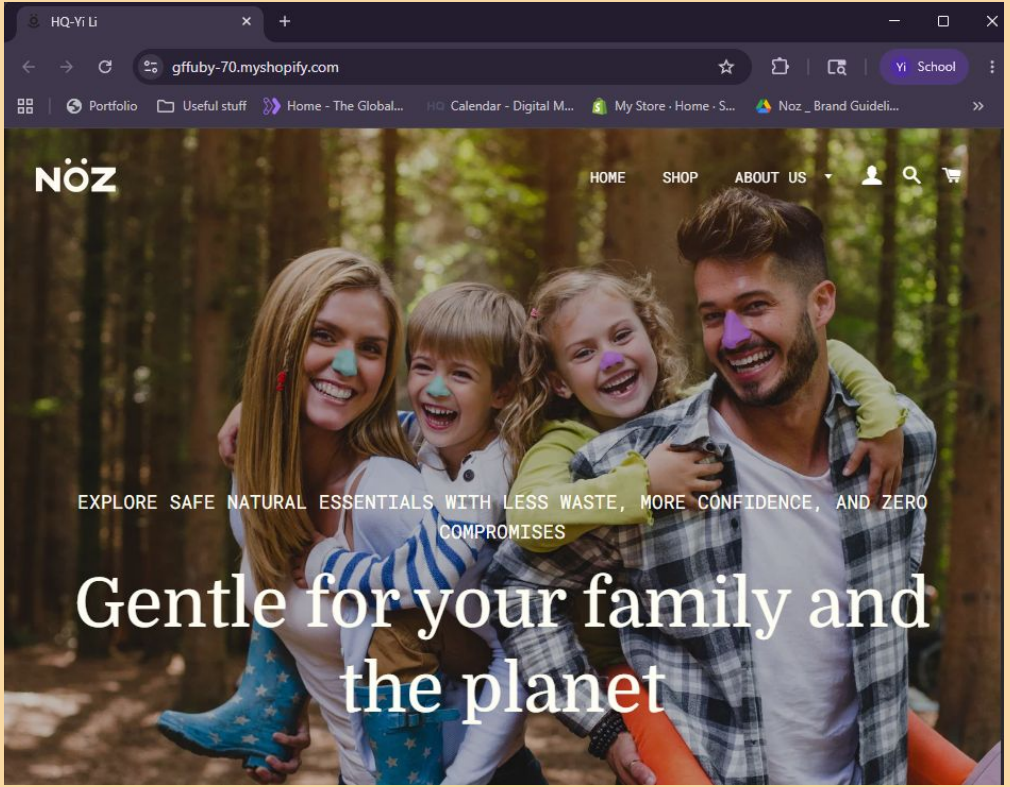

Color Choice Justification: I went with light for the background to make the site warm and inviting. And I went with green and light green to chase that nature color because Mary is very fixated on being environmentally friendly and so I thought green and light green would be the perfect colors to portray that. For buttons, I chose yellow because it contrasts the green and due to its intensity, it stands out and calls for action with an optimistic feel.
