Week 4
Tiktok lab

Ruba akbar, soja sunny, yi li

Concept ideas

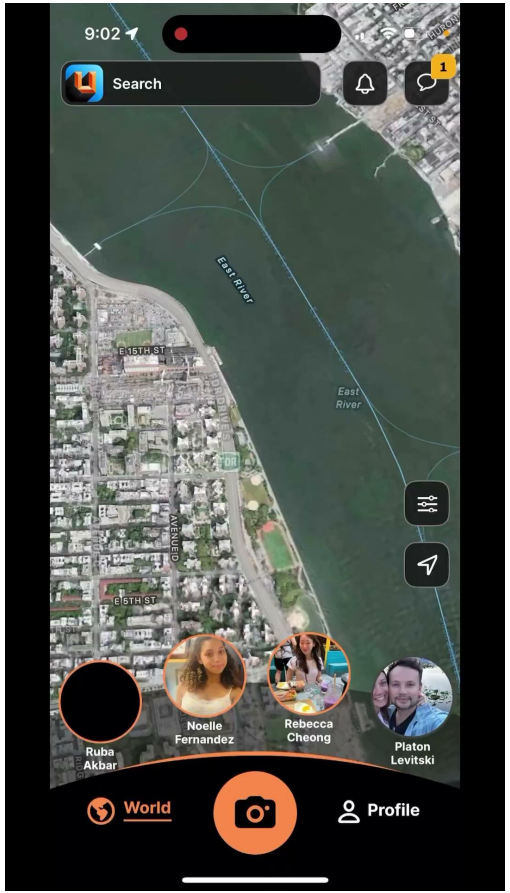

1. Vacation recap, where EX: Europe trip, looking around the continent for memories
2. If this feature is added, a video idea could be “Welcome to my world,” where you explore your own map
3. “how it started vs how it’s going” - the video would be an empty map to a full one, showing all the places you’ve been
4. The top 5 best places I’ve liked that I've been to
5. Top 5 worst places I’ve hated that I’ve been to
6. “Day in my life”
7. Story time over a post you’ve made
8. What I did in a week
9. Best vacation spots I’ve been to
10. Looking for fun spots from friends' posts
11. Looking around for places to go too
12. What I’m currently thinking about

Ruba akbar

First example Tiktok

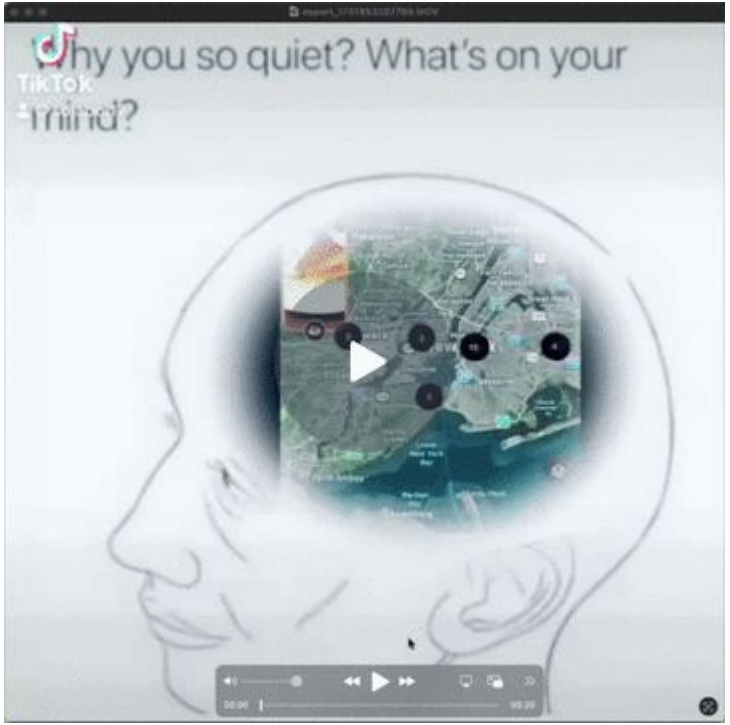

Explanation -

- Before going out, you check where other people have went to that maybe you haven't thought about before
- In the video, looking through the map help me find 2 places that I might go to with my sister to get a drink which I didn't know about before going on the map

Second example Tiktok

- Was a trending sound/template with audio of “sweet dreams” by Eurythmics
- Room for improvement:
  - Making the video full screen to see the images fully
- In the video, Im initially trying to show the other various videos/posts in the map and then ultimately showing a destination that i'm “currently thinking about”
